

Romad Ltd Environmental Policy

Romad is a market leading specialist solutions provider of mobile location based services for lone worker protection and personal security. We recognise that like many other businesses our operations have an effect on the local, regional and the global environment. As a consequence of this, the management is committed to continuous improvements in environmental performance and the prevention of pollution.

Environmental regulations, laws and codes of practice will be regarded as setting the minimum standards of environmental performance.

The company will use environmentally safe and sustainable energy sources to meet our needs. We will invest in improved energy efficiency of products we use and sell.

The company considers the environmental impacts of its products at all stages of their life cycle - from design, to manufacturing, customer use, and finally disposal.

The company will seek to conserve resources through efficient use and careful planning. The company maintains that a primary part of its corporate environmental strategy is sustainable waste management and as such recognises its responsibilities to recycle materials wherever possible.

We will work with our suppliers to ensure they recognise and reduce the environmental impact of their products and transportation.

We will implement our policies through regular meetings, guidelines and training. We will also conduct an annual self-evaluation of our performance in implementing these principles and in complying with all applicable laws and regulations.
